

# NEWLY DEVELOPED SPECIAL FOAM!

## POWER SOFT

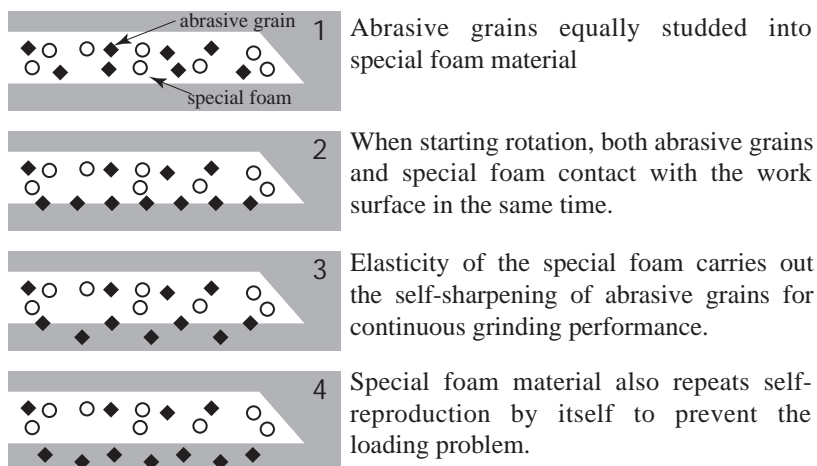

Effective fine finish with both single or double action sander  
Ideal for removal of paints, burn marks, scratches, weld spots etc.

### FEATURES

- MARKLESS FINISH**  
 With the high elasticity of newly developed special foamed material, POWER SOFT can contact with damaged surface smoothly and evenly for markless fine featheredge.
- NO LOADING**  
 There never happens loading problems due to repeating wasting and reproduction of foam material itself and self-sharpening of abrasive grains by the friction of grinding.
- FINER FINISH RESULT**  
 As abrasive grains studded into the elastic foam move up and down structurally, POWER SOFT can contact evenly with the work surface for finer finish result

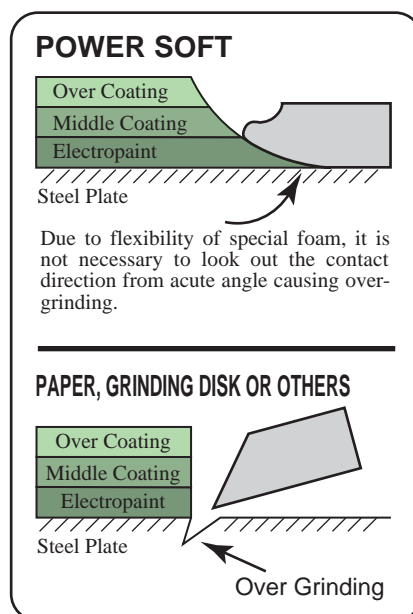

### INNOVATIVE MECHANISM OF POWER SOFT

#### <COMPARATIVE EXAMPLE>

Considerable reduction of working time!

POWER SOFT can reduce work time and processes for metal sheet such as a smoothing out of scratches etc. which needed about 5 steps of operation by conventional tools and process.
